OBJECTIVE

B.Tech Computer Science student (2023–2027) with experience developing full-stack web applications using JavaScript, React.js, Node.js, Express.js, MongoDB, and Django. Completed a Full Stack Development training program at GRAStech and independently built and deployed personal projects involving AI integration, authentication, APIs, and database management. Seeking a Software Development Engineer or Full-Stack Developer role where I can apply my MERN stack skills to build and deploy scalable applications.

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript (ES6+), SQL

Backend Frameworks: Node.js, Express.js, Django (Python)

Integrations: Stripe, Google Gemini API

Developer Tools: Git, GitHub, VS Code, Postman API Testing

Frontend Development: HTML5, CSS3, React.js

Databases & Cloud: MongoDB, MySQL, SQLite3

Deployement: Vercel, Render, MongoDB Atlas

Core Computer Science: DSA, DBMS, OOPs, OS, CN

EXPERIENCE

Full Stack Development Trainee **June 2026 – Aug 2026**

GRAStech

- Built MERN stack features using React, Node.js, Express and MongoDB as part of a live training project.
- Fixed bugs and tested new features before they were merged into the main branch.
- Worked in a team of 6 using Git and GitHub, with pull requests and code reviews.

TECHNICAL PROJECTS

DevMate AI (GitHub | Live Demo) **Full Stack AI Web Application (Google Gemini AI)**

- Built a full-stack AI-powered web application using **JavaScript, Node.js, Express.js, MongoDB Atlas, JWT Authentication, and Google Gemini AI**, enabling intelligent conversations, document analysis, image understanding, and coding assistance.
- Implemented AI-powered features including **conversation memory, file uploads, image analysis, code explanation, bug detection, code optimization, README generation, code review, and document summarization**.
- Developed secure authentication with **Email OTP verification, password recovery, chat history, shareable conversations, responsive UI, and deployment on Vercel**, delivering a scalable full-stack AI application.

Secure Video Authenticator (GitHub) **Python + Django + SQLite**

- Built a **Django-based video authentication platform** for media integrity verification and tamper detection.
- Implemented **SHA-256/MD5 hashing, chunked file processing, and magic-byte validation** for secure file verification.
- Developed **role-based authentication, Chart.js analytics, and PDF audit reports** using Django and SQLite.

Hospital Management System (GitHub | Live Demo) **Full Stack (MERN + Google Gemini AI)**

- Built a full-stack MERN hospital management platform using **React.js, Node.js, Express.js, MongoDB Atlas, JWT Authentication, and Google Gemini AI** to streamline hospital workflows and patient care.
- Built **4 role-based portals (Admin, Doctor, Receptionist, Patient)** with **Stripe payment integration**, security audit logs, rate limiting, and automated **PDFKit invoice & prescription generation**.
- Integrated **Google Gemini AI** for symptom assessment and healthcare conversations with **Gmail OTP authentication, secure password recovery, and deployment on Vercel & Render**.

EDUCATION

Bachelor of Technology – Computer Science & Engineering **2023 – 2027**

Babu Banarasi Das Northern India Institute of Technology, Lucknow *68%*

Intermediate (Class XII) – UP Board **2021**

Indar Prasad Chaudhary Janjaatiy Smarak Intermediate College, Maharajganj, Uttar Pradesh *69.40%*

High School (Class X) – UP Board **2018**

Baba Kamla Prasad Smarak Intermediate College, Maharajganj, Uttar Pradesh *76.16%*

CERTIFICATIONS

JPMorgan Chase – Software Engineering Job Simulation September 2025

AWS – Cloud Practitioner Essentials September 2025

AWS – Fundamentals of Machine Learning & AI September 2025

Tata Group – GenAI Powered Data Analytics Job Simulation October 2025

ACHIEVEMENTS

- **Problem Solving:** Solved 150+ coding problems on LeetCode and other coding platforms.
